NOT Long-Term Care Insurance

This is a life insurance benefit that also gives you the option to accelerate some or all of the death benefit in the event that you meet the criteria for a qualifying event described in the policy. This policy or certificate does not provide long-term care insurance subject to California long-term care insurance law. This policy or certificate is not a California Partnership for Long-Term Care program policy. This policy or certificate is not a Medicare supplement policy.

An accelerated death benefit such as the Chronic Illness Accelerated Benefit Rider and long-term care insurance provide very different kinds of benefits:

An accelerated death benefit is a rider to or other provision in a life insurance policy that permits the policy owner to accelerate some or potentially all of the death benefit of a life insurance policy if the insured meets the definition of having a chronic illness as defined in the rider or policy provision. Acceleration of death benefits and payments under such an accelerated death benefit will reduce the death benefit of the policy and reduce other policy values as well, potentially to zero. If the entirety of the insurance amount is accelerated, the policy terminates.

A Long Term Care insurance policy is any insurance policy, certificate, or rider providing coverage for diagnostic, preventive, therapeutic, rehabilitative, maintenance, or personal care services that are provided in a setting other than an acute care unit of a hospital. Long-term care insurance includes all products containing any of the following benefit types: coverage for institutional care including care in a nursing home, convalescent facility, extended care facility, custodial care facility, skilled nursing facility, or personal care home; home care coverage including home health care, personal care, homemaker services, hospice, or respite

care; or community-based coverage including adult day care, hospice, or respite care. Some ABRs and all LTCI are conditioned upon the insured not being able to perform two or more of the activities of daily living or being cognitively impaired. The activities of daily living are bathing, continence, dressing, eating, toileting, and transferring. Long-term care insurance includes disability based long-term care policies but does not include insurance designed primarily to provide Medicare supplement or major medical expense coverage.

If you are interested in long-term care, nursing home or home care insurance, you should consult with an insurance agent licensed to sell that insurance, inquire with the insurance company offering the accelerated death benefits, or visit the California Department of Insurance Internet Web site (www.insurance.ca.gov) section regarding long-term care insurance.

Receipt of accelerated death benefits may affect eligibility for public assistance programs, such as Medi-Cal or Medicaid. Prior to electing to receive the accelerated death benefit, you should consult with the appropriate social services agency concerning how receipt of accelerated death benefits may affect that eligibility.

If the policy terminates, the Chronic Illness Accelerated Death Benefit Rider will also terminate.

LTC expense reimbursement vs. ADB benefits are paid without receipts. LTC benefits are based on benefit levels and a pool of money selected at the time of purchase, and ADB benefits depend on the life policy value. ADB benefits will reduce the death benefit that the policyholder's heirs will receive, and the use of the ADB proceeds is unrestricted, whereas LTC benefits will not reduce the death benefit that the policyholder's heirs will receive, and the policyholder must use LTC benefits for LTC services.

Please note: The life insurance offered with Accelerated Benefit Riders is not stand-alone long term care insurance, disability income insurance, or other insurance designed to cover specific costs associated with an illness or condition. Receiving benefits under any one of the Accelerated Benefit Riders will reduce the amounts available for future acceleration under it and any of the others. It will also reduce the base life insurance benefit and the funds available to supplement retirement or other needs and may result in policy termination. The amount received after acceleration may be less than what is needed to cover all of the cost associated with an illness or condition.
